ISAAC OKWUZI

isaacokwuzi@gmail.com • https://isaacokwuzi.vercel.app • linkedin.com/in/isaac-okwuzi-0304791b9

Design Engineer

Detail-obsessed designer and engineer with experience in designing and building both Fintech and Utility software. Skilled at simplifying complex systems and delivering thoughtfully crafted experiences to earn user trust. I'm also experienced in coding, technical documentation, and able to thrive in dynamic teams and fast-changing environments

WORK EXPERIENCE

ServeLead Humanitarian Initiative **05/2026 - Present**

Servelead Humanitarian Initiative (S.H.I) is a non-profit organization dedicated to advancing the United Nations Sustainable Development Goals (SDGs) through community development and empowerment initiatives.

Lead Product Designer • Full-time **Abuja, Nigeria**

- Lead the end-to-end product design lifecycle for new features, spanning user research, structural wireframing, and interactive prototyping.
- Develop and maintain robust cross-platform design systems to serve as a unified source of truth, ensuring visual and behavioral consistency across Web, iOS, and Android applications.
- Implement WCAG web standards to guarantee full accessibility for diverse user groups.
- Collaborate closely with engineering teams to align responsive layouts with technical constraints and optimize implementation workflows.
- Redesigning the gathr.gives mobile app for Social Good Fund USA.

Simpl Technologies **03/2024 - Present**
Founding Member **Remote**

- Lead UI/UX design and documentation for product launches, ensuring high-quality web aesthetics and user experience.
- Conduct deep user and system research to inform design decisions and ensure optimal product outcomes.
- Collaborate with engineers to ensure design consistency from mission to rollout, integrating web design concepts effectively.

Independent Contractor **11/2024 - 05/2026**
Product Design **Remote**

- Solving complex design and engineering problems for individuals and small business clients, focusing on web aesthetics and user interfaces.
- Streamlining interfaces to prioritize clarity and efficiency, reducing cognitive overload and enhancing user flows.
- Delivering visually compelling and functional web design projects, demonstrating a high taste for aesthetics and innovative layouts.

Thrive Nest **01/2024 - 02/2025**
Design Coach **FCT, Abuja**

- Developed and delivered a peer-driven curriculum on product design fundamentals, including UI/UX standards and web design principles.
- Mentored aspiring designers through hands-on, applied projects, fostering a strong understanding of core design principles and best practices.

GSG Ventures **10/2021 - 01/2023**
Business Development Lead • Full-time **Lagos, Nigeria**

- Pioneered an innovative crowdsourced delivery model that leveraged our B2B client network for last-mile logistics.
- Optimized distribution routes by incentivizing our existing customers to make deliveries to others along their regular paths, cutting down operational overhead, and scaling down the need for a dedicated fleet, reducing our logistics costs and making us able to offer more competitive delivery fees to our clients.

Warehouse manager • Part-time **Lagos, Nigeria**

- Spearheaded the automation of the company's inventory management system across multiple warehouses.
- Designed a proprietary tool to provide real-time stock level monitoring and generate automated reorder alerts.
- This system eliminated manual tracking errors, prevented stock outs, and significantly improved operational efficiency.

Moonlight Hub **08/2018 - 10/2018**

SMB focused on providing on-demand internet access and basic IT services to customers.

Technical Support Assistant • Full-time **Lagos, Nigeria**

- **Maintained the LAN**, managing all network cables to ensure reliable wi-fi connectivity and seamless internal data transfer/resource sharing between systems for customers.
- **Performed routine maintenance, troubleshooting, and repairs** on all computers to minimize downtime and guarantee optimal performance for both staff and clients.
- **Handled the installation, configuration, and regular updates of operating systems and various software applications** across all workstations, supporting daily business operations.
- **Acted as the first point of contact for customers**, assisting them with technical issues, software usage, and general IT related queries, providing friendly and efficient support.
- Strengthened service delivery standards to meet the company's commitment to accessible and dependable technology for all customers.

EDUCATION

Certification in Software engineering
ALX Africa — Rwanda (Remote) • 04/2023 - 03/2024

B.Sc., Computer Science
University of Benin — Benin City, Edo • 01/2018 - 01/2022

CERTIFICATIONS

Requirements Analysis and Agile Methodologies 07/2023
IIBA & Linkedin

Business Analysis 07/2023
Linkedin

AWARDS & SCHOLARSHIPS

Feedback Winner (Baseline Tooling Hackathon) 10/2025
Google

PROJECTS

copiedcatz 11/2025 - 12/2025
Built an AI powered image analysis & generation platform that extracts and remixes visual attributes (lighting, depth, composition, etc.) from reference photos, enabling users to generate consistent, professional-grade variations. Powered by google's gemini and the new FIBO model from bria ai.

Baseguard 09/2025 - 10/2025

Personal

Built and opensourced a command-line tool that blocks browser compatibility bugs from going live. When developers commit their code, Baseguard:

- Scans for features that are not supported using official Baseline data.
- Uses Gemini AI to give advice on best fixes and explain user impact.
- Automatically applies fixes using either the Jules coding agent or Gemini 2.5 pro.

Developers can use the newest features in JavaScript and CSS, and Baseguard will make sure everything works in the browsers their users need.

Cookflow++ 09/2025 - 09/2025

Personal

Vibe coded an app that t**urns any youtube cooking video into a hands-free, voice-guided cooking experience.**

[https://dev.to/otnotorious/cookflow-turn-any-youtube-recipe-into-a-hands-free-voice-guided-cooking-experience-3ce1]

learningwithgrace.xyz 05/2025 - 07/2025

Platform where anyone can go to learn anything.

- AI Tutoring: Users can jump on live video calls with an AI tutor to get real-time explanations of any concepts they don't understand.
- Progress Analytics: The platform provides analytics to track progress and identify areas for improvement.
- Automated Assessments: Automatically generates tests after each topic to reinforce learning and ensure comprehension. [https://youtu.be/8RNzRDRpXEw]

VOLUNTEERING & LEADERSHIP

RCCG JE Abuja 09/2025 - Present

Product designer abuja, Federal Capital Territory

Reachout Nigeria 03/2024 - Present

Technical Volunteer abuja, Federal Capital Territory

Part of the team building automated, solar-powered boreholes in remote communities that have never had running water.

SKILLS

Administrative Skills, Build solutions, Cross-Functional Coordination, Follow-up, Initiative, Internal teams, Positioning, Senior leadership, Strategic initiatives, Ticketing

Design: Accessibility, Figma, Framer, Interaction Design, Product Design, Prototyping, Usability Testing, User Experience (UX), User Interface (UI) Design, Web Design Aesthetics, Wireframing

Technical: AI tools, Algorithms, APIs, Bash, C, Data Structures, Git, Google Cloud Platform (GCP), HTML/CSS, JavaScript/TypeScript, Linux, Python, ReactJS, SQL

Business & Product: Administration, Agile Methodologies, Business Analysis, Customer Success, Jira, Market Research, Microsoft 365, Product Management, Project Management, Requirements Analysis, Trello

Soft Skills: Adaptability, AI Prompt Engineering, Analytical Skills, Attention to Detail, Collaboration, Communication (Written & Verbal), Compliance, Discretion, Leadership, Organization, Prioritization, Proactivity, Problem Solving, Reliability, Stakeholder Management, Team Collaboration, Time Management, User Research
